Author Index

Vol. 1, Nos. 1-5

A

Ahrens, E. H., Jr. See *Stoffel and Ahrens,* 139
Akahori, Yukio. See *Radin, Hajra, and Akahori,* 250
Albrink, Margaret J. The microtitration of total fatty acids of serum, with notes on the estimation of triglycerides, 53
Alonzo, Nicholas F. See *Rapport, Graf, and Alonzo,* 301
Altschul, Aaron M. See *Ory, St. Angelo, and Altschul,* 208
Antonis, Arnold. The colorimetric determination of ester groups in lipid extracts, 485

B

Baer, Erich. See *Buchnea and Baer,* 405
Bergquist, Lois M. See *Searcy, Bergquist, and Jung,* 349
Berry, James F. See *Gjone, Berry, and Turner,* 66
Best, Maurice M. See *Duncan and Best,* 159
Beveridge, J. M. R. See *Kuksis and Beveridge,* 311
Bradbeer, Clive, and **P. K. Stumpf.** Fat metabolism in higher plants: XIII. Phosphatidic acid synthesis and diglyceride phosphokinase activity in mitochondria from peanut cotyledons, 214
Correction, 359
Bragdon, J. H. On certain conventions, 2
—, and **A. Karmen.** The fatty acid composition of chylomicrons of chyle and serum following the ingestion of different oils, 167
—. See *Michajlik and Bragdon,* 164
Brown, J. B. See *McCormick, Cornwell, and Brown,* 221
Brown, L. See *Popják, Lowe, Moore, Brown, and Smith,* 29
Buchnea, Dmytro, and **Erich Baer.** Synthesis of enantiomeric mixed-acid α, β-diglycerides, 405
Byers, Sanford O., and **Meyer Friedman.** Effect of infusions of phosphatides upon the atherosclerotic aorta *in situ* and as an ocular aortic implant, 343

C

Carroll, K. K. Effect of cerebroside preparations on sterol excretion in the rat, 171
Chaikoff, I. L. See *Hill, Webster, Linazasoro, and Chaikoff,* 150
—. See *Williams, Hill, and Chaikoff,* 236
Cheng, Amber L. S., and **D. B. Zilversmit.** Determination of cholesterol and triglycerides in rat plasma, 190
Cherkes, Amelia, and **Robert S. Gordon, Jr.** The liberation of lipoprotein lipase by heparin from adipose tissue incubated *in vitro,* 97
Colás, Antonio, and **Alfredo López.** The determination of hydroxysteroids as their 3,5-dinitrobenzoates, 486
Collins, F. D., and **Valerie L. Shotlander.** Low temperature chromatoggraphy of lipids on cellulose, 352
Cornforth, J. W. Biosynthesis of fatty acids and cholesterol considered as chemical processes, 3
Cornwell, David G. See *McCormick, Cornwell, and Brown,* 221
Corse, Joseph, and **Roy Teranishi.** Stabilization of polyester stationary phases for gas-liquid chromatography, 191
Cottrell, Martha C. See *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
Cress, Edgar A. See *Snyder, Cress, and Kyker,* 125

D

Dieckert, Julius W. See *Swartwout, Dieckert, Miller, and Hamilton,* 281
Duncan, Charles H., and **Maurice M. Best.** Lack of nicotinic acid effect on cholesterol metabolism of the rat, 159

E

Engel, Frank L. See *Marshall and Engel,* 339
Estes, E. Harvey, Jr. See *Trout, Estes, and Friedberg,* 199

F

Fash, F. J. See *Neptune, Sudduth, Foreman, and Fash,* 229
Feist, E. See *Feller and Feist,* 90
Feller, D. D., and **E. Feist.** Metabolism of adipose tissue: Incorporation of isoleucine carbon into lipids by slices of adipose tissue, 90
Fontell, Krister, Ralph T. Holman and **Georg Lambertsen.** Some new methods for separation and analysis of fatty acids and other lipids, 391
—. See *Morris, Holman, and Fontell,* 412
Ford, T. See *Marinetti, Ford, and Stotz,* 203
Foreman, D. R. See *Neptune, Sudduth, Foreman, and Fash,* 229
Friedberg, Samuel J. See *Trout, Estes, and Friedberg,* 199
Friedman, Meyer. See *Byers and Friedman,* 343

G

Gjone, Egil, James F. Berry and **David A. Turner.** The isolation and identification of lysolecithin from lipid extracts of normal human serum, 66
Goldfien, Alan. See *Havel and Goldfien,* 102
Goodman, DeW. S., and **G. Popják.** Studies on the biosynthesis of cholesterol: XII. Synthesis of allyl pyrophosphates from mevalonate and their conversion into squalene with liver enzymes, 286
Gordon, Robert S., Jr. See *Cherkes and Gordon,* 97
Graf, Liselotte. See *Rapport, Graf, and Alonzo,* 301
Grossman, Charles M., and **Alan M. MacEwan.** Preservation and photography of rhodamine 6G stained lipid spots, 488

H-I

Hajra, Amiya K. See *Radin, Hajra, and Akahori,* 250
Hamilton, James G. See *Muldrey, Miller, and Hamilton,* 48
—. See *Swartwout, Dieckert, Miller, and Hamilton,* 281
Hanahan, Donald J., Ruth M. Watts and **Douglas Pappajohn.** Some chemical characteristics of the lipids of human and bovine erythrocytes and plasma, 421
Harper, A. E. See *Seidel, Nath, and Harper,* 474
Havel, Richard J., and **Alan Goldfien.** The role of the sympathetic nervous system in the metabolism of free fatty acids, 102
Haverkamp, Begemann, P. See *Schogt, Haverkamp Begemann, and Koster,* 446
Hawthorne, J. N. The inositol phospholipids, 255
—. See *Hübscher, Hawthorne, and Kemp,* 433
Hill, R., William W. Webster, José M. Linazasoro, and **I. L. Chaikoff.** Time of occurrence of changes in the liver's capacity to utilize acetate for fatty acid and cholesterol synthesis after fat feeding, 150
—. See *Williams, Hill, and Chaikoff,* 236
Hirsch, Jules. See *Peterson and Hirsch,* 132
Holman, Ralph T. See *Fontell, Holman, and Lambertsen,* 391
—. See *Morris, Holman, and Fontell,* 412
Horning, E. C. See *Horning, Williams, and Horning,* 482
Horning, M. G., E. A. Williams and **E. C. Horning.** Separation of tissue cho-

—. See *Morris, Holman, and Fontell,* 412
Horning, E. C. See *Horning, Williams, and Horning,* 482
Horning, M. G., E. A. Williams and **E. C. Horning.** Separation of tissue cho-

lesterol esters and triglycerides by silicic acid chromatography, 482
Hübscher, G., J. N. Hawthorne and **P. Kemp.** The analysis of tissue phospholipids. Hydrolysis procedure and results with pig liver, 433

J

Jung, Ralph C. See *Searcy, Bergquist, and Jung,* 349

K

Karmen, A. See *Bragdon and Karmen,* 167
Kemp, P. See *Hübscher, Hawthorne, and Kemp,* 433
Kishimoto, Yasuo, and **Norman S. Radin.** Isolation and determination methods for brain cerebrosides, hydroxy fatty acids, and unsaturated and saturated fatty acids, 72
—, and —. Composition of cerebroside acids as a function of age, 79
Kochen, J., G. V. Marinetti and **Elmer Stotz.** The lipids of the myocardium, conducting bundle, and valves of beef heart, 147
Kolman, Ruth R. See *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
Koster, J. See *Schogt, Haverkamp Begemann, and Koster,* 446
Kritchevsky, David, Ruth R. Kolman, Michael W. Whitehouse, Martha C. Cottrell, and **Ezra Staple.** Oxidation of cholesterol by rat liver mitochondria: Effect of dietary fat, 83
—, **Michael W. Whitehouse** and **Ezra Staple.** Oxidation of cholesterol-26-C^{14} by rat liver mitochondria: Effect of nicotinic acid, 154
Kuksis, A., and **J. M. R. Beveridge.** Composition of molecular distillates of corn oil. Isolation and identification of sterol esters, 311
Kummerow, Fred A. See *Nishida and Kummerow,* 450
Kuron, Gunther W. See *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469
Kyker, Granvil C. See *Snyder, Cress, and Kyker,* 125

L

Lambertsen, Georg. See *Fontell, Holman, and Lambertsen,* 391
Lands, William E. M. See *Warner and Lands,* 248
Linazasoro, José M. See *Hill, Webster, Linazasoro, and Chaikoff,* 150
López, Alfredo. See *Colás and López,* 486
Lowe, A. E. See *Popják, Lowe, Moore, Brown, and Smith,* 29

M

McCandless, E. L. See *Zilversmit and McCandless,* 118
McCormick, Eugene C., David G. Cornwell and **J. B. Brown.** Studies on the distribution of tocopherol in human serum lipoproteins, 221
MacEwan, Alan M. See *Grossman and MacEwan,* 488
Marcus, Aaron J., Harris L. Ullman and **Morris Wolfman.** Studies on blood platelet phospholipids, 179
Correction, 251
Marinetti, G. V., T. Ford and **Elmer Stotz.** The structure of cerebrosides in Gaucher's disease, 203
—. See *Kochen, Marinetti, and Stotz,* 147
Marshall, Norman B., and **Frank L. Engel.** The influence of epinephrine and fasting on adipose tissue content and release of free fatty acids in obese-hyperglycemic and lean mice, 339
Mead, James F., and **Judd C. Nevenzel.** The question of biohydrogenation of fatty acids, 305
Michajlik, A., and **J. H. Bragdon.** Effects of intravenous heparin on oxidation of fat, 164
Miller, O. Neal. See *Muldrey, Miller, and Hamilton,* 48
—. See *Swartwout, Dieckert, Miller, and Hamilton,* 281
Moore, D. See *Popják, Lowe, Moore, Brown, and Smith,* 29
Morris, Lindsay J., Ralph T. Holman and **Krister Fontell.** Alteration of some long-chain esters during gas-liquid chromatography, 412
Moscatelli, E. A. See *Sweeley and Moscatelli,* 40
Muldrey, James E., O. Neal Miller and **James G. Hamilton.** Quantitative glass paper chromatography: phosphatidyl choline and sphingomyelin, 48

N

Nath, Narindar. See *Seidel, Nath, and Harper,* 474
Neptune, E. M., Jr., H. C. Sudduth, D. R. Foreman, and **F. J. Fash.** Phospholipid and triglyceride metabolism of excised rat diaphragm and the role of these lipids in fatty acid uptake and oxidation, 229
Nevenzel, Judd C. See *Mead and Nevenzel,* 305
Nishida, Toshiro, and **Fred A. Kummerow.** Interaction of serum lipoproteins with the hydroperoxide of methyl linoleate, 450

O

Ory, Robert L., Allen J. St. Angelo and **Aaron M. Altschul.** Castor bean lipase: Action on its endogenous substrate, 208
Ott, Walther H. See *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469

P-Q

Page, Irvine H. See *Schotz and Page,* 466
Pappajohn, Douglas. See *Hanahan, Watts, and Pappajohn,* 421
Peterson, Malcolm L., and **Jules Hirsch.** A calculation for locating the carrier gas front of a gas-liquid chromatogram, 132
Popják, G., A. E. Lowe, D. Moore, L. Brown, and **F. A. Smith.** Scintillation counter for the measurement of radioactivity of vapors in conjunction with gas-liquid chromatography, 29
Correction, 197
—. See *Goodman and Popják,* 286

R

Radin, Norman S., Amiya K. Hajra and **Yukio Akahori.** Preparation of methyl esters, 250
—. See *Kishimoto and Radin,* 72
—. See *Kishimoto and Radin,* 79
Rapport, Maurice M., Liselotte Graf and **Nicholas F. Alonzo.** Immunochemical studies of organ and tumor lipids: VIII. Comparison of human tumor and ox spleen cytosides, 301
Reiser, Raymond, Mary C. Williams and **Mary F. Sorrels.** The transport and dynamic state of exogenous glycerol- and palmitic acid-labeled tripalmitin, 241
Robinson, D. S. The effect of changes in nutritional state of the lipolytic activity of rat adipose tissue, 332
Ryhage, Ragnar, and **Einar Stenhagen.** Mass spectrometry in lipid research, 361

S

Schogt, J. C. M., P. Haverkamp Begemann and **J. Koster.** Nonphosphatide aldehydogenic lipids in milk fat, beef tallow, and ox heart, 446
Schotz, Michael C., and **Irvine H. Page.** Effect of adrenergic blocking agents on the release of free fatty acids from rat adipose tissue, 466
Searcy, Ronald L., Lois M. Bergquist and **Ralph C. Jung.** Rapid ultramicro estimation of serum total cholesterol, 349
Seidel, J. C., Narindar Nath and **A. E. Harper.** Diet and cholesterolemia. V. Effects of sulfur-containing amino acids and protein, 474
Shafrir, Eleazar, Karl E. Sussman and **Daniel Steinberg.** The nature of the epinephrine-induced hyperlipidemia in dogs and its modification by glucose, 109
—, —, and —. Role of the pituitary and the adrenal in the mobilization of free fatty acids and lipoproteins, 459
Shapiro, B. See *Stein and Shapiro,* 326
Shore, B., and **V. Shore.** NH_2-terminal amino acids of the serum lipoproteins of normal and hypercholesterolemic rabbits, 321
Shore, V. See *Shore and Shore,* 321
Shotlander, Valerie L. See *Collins and Shotlander,* 352
Siegel, Henry. See *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469

Smith, F. A. See *Popják, Lowe, Moore, Brown, and Smith,* 29
Snyder, Fred, Edgar A. Cress and **Granvil C. Kyker.** Liver lipid response to intravenous rare earths in rats, 125
Sorrels, Mary F. See *Reiser, Williams, and Sorrels,* 241
St. Angelo, Allen J. See *Ory, St. Angelo, and Altschul,* 208
Staple, Ezra. See *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
—. See *Kritchevsky, Whitehouse, and Staple,* 154
Stein, Y. and **B. Shapiro.** Uptake and metabolism of triglycerides by the rat liver, 326
Steinberg, Daniel. See *Shafrir, Sussman, and Steinberg,* 109
—. See *Shafrir, Sussman, and Steinberg,* 459
Stenhagen, Einar. See *Ryhage and Stenhagen,* 361
Stoffel, W., and **E. H. Ahrens, Jr.** The unsaturated fatty acids in menhaden body oil: The C_{18}, C_{20}, and C_{22} series, 139
Stotz, Elmer. See *Kochen, Marinetti, and Stotz,* 147
—. See *Marinetti, Ford, and Stotz,* 203
Stumpf, P. K. See *Bradbeer and Stumpf,* 214
Sudduth, H. C. See *Neptune, Sudduth, Foreman, and Fash,* 229
Sussman, Karl E. See *Shafrir, Sussman, and Steinberg,* 109
—. See *Shafrir, Sussman, and Steinberg,* 459
Swartwout, Joseph R., Julius W. Dieckert, O. Neal Miller, and **James G. Hamilton.** Quantitative glass paper chromatography: A microdetermination of plasma cholesterol, 281
Sweeley, C. C., and **E. A. Moscatelli.** Qualitative microanalysis and estimation of sphingolipid bases, 40

T

Tattrie, N. H. Positional distribution of saturated and unsaturated fatty acids on egg lecithin, 60
Tennent, David M., Henry Siegel, Mary E. Zanetti, Gunther W. Kuron, Walther H. Ott, and **Frank J. Wolf.** Plasma cholesterol lowering action of bile acid binding polymers in experimental animals, 469
Teranishi, Roy. See *Corse and Teranishi,* 191
Trout, David L., E. Harvey Estes, Jr. and **Samuel J. Friedberg.** Titration of free fatty acids of plasma: A study of current methods and a new modification, 199
Turner, David A. See *Gjone, Berry, and Turner,* 66

U

Ullman, Harris L. See *Marcus, Ullman, and Wolfman,* 179

V

van Gent, C. M. See *Woodford and van Gent,* 188

W-X-Y

Warner, Huber R., and **William E. M. Lands.** Application of a nomogram to gradient elution chromatography, 248
Watts, Ruth M. See *Hanahan, Watts, and Pappajohn,* 421
Webster, William W. See *Hill, Webster, Linazasoro, and Chaikoff,* 150
Wheeldon, L. W. Composition of cabbage leaf phospholipids, 439
Whitehouse, Michael W. See *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
—. See *Kritchevsky, Whitehouse, and Staple,* 154
Williams, E. A. See *Horning, Williams, and Horning,* 482
Williams, Mary C. See *Reiser, Williams, and Sorrels,* 241
Williams, Wallace R., R. Hill and **I. L. Chaikoff.** Portal venous injection of insulin in the diabetic rat: Time of induction of changes in hepatic lipogenesis, cholesterogenesis, and glycogenesis, 236
Wolf, Frank J. See *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469
Wolfman, Morris. See *Marcus, Ullman, and Wolfman,* 179
Woodford, F. P., and **C. M. van Gent.** Gas-liquid chromatography of fatty acid methyl esters: The "carbon-number" as a parameter for comparison of columns, 188

Z

Zanetti, Mary E. See *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469
Zilversmit, D. B., and **E. L. McCandless.** Independence of arterial phospholipid synthesis from alterations in blood lipids, 118
—. See *Cheng and Zilversmit,* 190

Volume 1
Number 5

Subject Index

Vol. 1, Nos. 1-5

(NM) = Notes on Methodology (Rev) = Review

A

Acetate: Utilization by liver for fatty acid and cholesterol synthesis, fat feeding, effect, *Hill, Webster, Linazasoro, and Chaikoff,* 150

Adipose tissue: Free fatty acids in obese-hyperglycemic and lean mice, influence of epinephrine and fasting, *Marshall and Engel,* 339

— — —; release adrenergic blocking agents, effect, *Schotz and Page,* 466

Lipolytic activity, changes in nutritional state, effect, *Robinson,* 332

Lipoprotein lipase liberation by heparin *in vitro, Cherkes and Gordon,* 97

Metabolism; incorporation of isoleucine carbon into lipids, *Feller and Feist,* 90

Adrenal: Role in mobilization of free fatty acids and lipoproteins, *Shafrir, Sussman, and Steinberg,* 459

Andrenergic blocking agents: Free fatty acids, release, adipose tissue, effect, *Schotz and Page,* 466

Allyl pyrophosphates: Synthesis from mevalonate and conversion to squalene with liver enzymes, *Goodman and Popják,* 286

Amino acids: NH_2-terminal, serum lipoproteins, normal and hypercholesterolemic rabbits, *Shore and Shore,* 321

Sulphur containing; diet, serum cholesterol, effects, *Seidel, Nath, and Harper,* 474

Aorta: Atherosclerotic; phosphatide infusions, effect, *Byers and Friedman,* 343

Arterial phospholipid: Independence of synthesis from alterations in blood lipids, *Zilversmit and McCandless,* 118

B

Biohydrogenation: Fatty acids, *Mead and Nevenzel,* 305

Bile acid(s): Binding polymers; plasma cholesterol, effect, *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469

Blood platelet: Phospholipids, *Marcus, Ullman, and Wolfman,* 179

Brain: Cerebrosides; isolation, determination, *Kishimoto and Radin,* 72

C

Cabbage: Leaf, composition, phospholipid, *Wheeldon,* 439

Castor bean: Lipase, action on endogenous substrate, *Ory, St. Angelo, and Altschul,* 208

Cellulose: Low temperature chromatography of lipids (NM), *Collins and Shotlander,* 352

Cerebroside(s): Brain; isolation, determination, hydroxy, unsaturated, saturated fatty acids, *Kishimoto and Radin,* 72

Fatty acids; composition as function of age, *Kishimoto and Radin,* 79

Sterol excretion in rats, effect, *Carroll,* 171

Structure, Gaucher's disease, *Marinetti, Ford, and Stotz,* 203

Cholesterol: Biosynthesis as chemical process (Rev), *Cornforth,* 3

—; synthesis allyl pyrophosphates from mevalonate, conversion into squalene with liver enzymes, *Goodman and Popják,* 286

—26-C^{14}; oxidation, rat liver mitochondria; nicotinic acid, effect, *Kritchevsky, Whitehouse, and Staple,* 154

Esters, tissue; separation by silicic acid chromatography (NM), *Horning, Williams, and Horning,* 482

Metabolism; lack of effect of nicotinic acid, *Duncan and Best,* 159

Oxidation, liver mitochondria; dietary fat, effect, *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83

Plasma; bile acid, binding polymers, effect, *Tennent, Siegel, Zanetti, Kuron, Ott, and Wolf,* 469

—; microdetermination, glass paper chromatography, *Swartwout, Dieckert, Miller, and Hamilton,* 281

— rat (NM), *Cheng and Zilversmit,* 190

Serum; diet, sulphur containing amino acids and protein, effects, *Seidel, Nath, and Harper,* 474

— total; ultramicro estimation (NM), *Searcy, Bergquist, and Jung,* 349

Synthesis from acetate after fat feeding, *Hill, Webster, Linazasoro, and Chaikoff,* 150

—; insulin in diabetic rat, effect, *Williams, Hill, and Chaikoff,* 236

Chromatography: Fatty acids, lipids, methods for separation (Rev), *Fontell, Holman, and Lambertsen,* 391

Gas-liquid; alteration of long chain esters, *Morris, Holman, and Fontell,* 412

—; calculations for locating carrier gas front (NM), *Peterson and Hirsch,* 132

—; fatty acid methyl esters; "carbon number" as parameter for comparison of columns (NM), *Woodford and van Gent,* 188

—; scintillation counter for measurement of radioactivity of vapors, *Popják, Lowe, Moore, Brown, and Smith,* 29

—; stationary phase, polyester, stabilization (NM), *Corse and Teranishi,* 191

Glass paper; microdetermination, plasma cholesterol, *Swartwout, Dieckert, Miller, and Hamilton,* 281

—; phosphatidyl choline, spingomyelin, *Muldrey, Miller, and Hamilton,* 48

Gradient elution; nomogram (NM), *Warner and Lands,* 248

Lipids, cellulose, low temperature (NM), *Collins and Shotlander,* 352

Paper; rhodamine 6G, lipid stain, preservation and photography (NM), *Grossman and MacEwan,* 488

Silicic acid; phospholipids, lysolecithin, *Gjone, Berry, and Turner,* 66

— —; tissue cholesterol esters and triglycerides (NM), *Horning, Williams, and Horning,* 482

Chylomicron(s): Chyle, serum; fatty acid composition following ingestion of oils, *Bragdon and Karmen,* 167

Corn oil: Molecular distillates; isolation, identification of sterol esters, *Kuksis and Beveridge,* 311

Crystallization: Fatty acids, lipids, methods for separation (Rev), *Fontell, Holman, and Lambertsen,* 391

Cytoside(s): Human tumor and ox spleen, *Rapport, Graf, and Alonzo,* 301

D

Diabetes: Alloxan, rat; insulin effect, hepatic lipogenesis, cholesterogenesis, and glycogenesis, *Williams, Hill, and Chaikoff,* 236

Diet: Amino acids, sulfur-containing, protein, blood cholesterol, effects, *Seidel, Nath, and Harper,* 474

Diaphragm: Metabolism, phospholipid, triglyceride; fatty acid uptake, oxidation, role, *Neptune, Sudduth, Foreman, and Fash,* 229

Diglyceride(s): α,β-, Enantiomeric mixed-acid, synthesis, *Buchnea and Baer,* 405

Distillation: Fatty acids, lipids, methods for separation (Rev), *Fontell, Holman, and Lambertsen,* 391

E

Epinephrine: Hyperlipidemia induced in dogs, modification by glucose, *Shafrir, Sussman, and Steinberg,* 109
Influence on adipose tissue content and release of free fatty acids in obese-hyperglycemic and lean mice, *Marshall and Engel,* 339
Erythrocytes: Human and bovine, lipids, chemical characteristics, *Hanahan, Watts, and Pappajohn,* 421
Ester groups: Colorimetric determination in lipids (NM), *Antonis,* 485

F

Fat(s): Dietary; effect on fatty acids of chylomicrons of chyle and serum, *Bragdon and Karmen,* 167
—; oxidation, cholesterol, rat liver mitochondria, effect, *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
Feeding; fatty acid, cholesterol synthesis, effect, *Hill, Webster, Linazasoro, and Chaikoff,* 150
Oxidation; heparin, effect, *Michajlik and Bragdon,* 164
Fatty acid(s): Biohydrogenation, *Mead and Nevenzel,* 305
Biosynthesis as chemical process (Rev), *Cornforth,* 3
Brain cerebroside; isolation and determination, *Kishimoto and Radin,* 72
Cerebroside; composition as function of age, *Kishimoto and Radin,* 79
Composition, chyle, serum chylomicrons, oil ingestion, *Bragdon and Karmen,* 167
Egg lecithin; positional distribution, saturated, unsaturated, *Tattrie,* 60
Free; plasma determination, *Trout, Estes, and Friedberg,* 199
— —; mobilization, role of pituitary, adrenal, lipoproteins, *Shafrir, Sussman, and Steinberg,* 459
—; release from adipose tissue, effect of adrenergic blocking agents, *Schotz and Page,* 466
—; — — — — in obese-hypoglycemic and lean mice; influence of epinephrine and fasting, *Marshall and Engel,* 339
—; role of sympathetic nervous system in metabolism, *Havel and Goldfien,* 102
Long chain, esters; alteration during gas-liquid chromatography, *Morris, Holman, and Fontell,* 412
Methods for separation and analysis (Rev), *Fontell, Holman, and Lambertsen,* 391
Serum total; microtitration, *Albrink,* 53
Synthesis; insulin in diabetic rat, effect, *Williams, Hill, and Chaikoff,* 236
—; from acetate after fat feeding, *Hill, Webster, Linazasoro, and Chaikoff,* 150
Uptake and oxidation by excised rat diaphragm, *Neptune, Sudduth, Foreman, and Fash,* 229
Unsaturated, C_{18}, C_{20}, C_{22}, in menhaden body oil, *Stoffel and Ahrens,* 139

G

Gaucher's disease: Cerebrosides, structure, *Marinetti, Ford, and Stotz,* 203
Glucose: Modification of epinephrine-induced hyperlipidemia in dogs, *Shafrir, Sussman, and Steinberg,* 109
Glycogenesis: Hepatic; insulin in diabetic rat, effect, *Williams, Hill, and Chaikoff,* 236
Gradient elution: Chromatography, nomogram (NM), *Warner and Lands,* 248

H

Heart: Beef; lipids of myocardium, conducting bundle, and valves, *Kochen, Marinetti, and Stotz,* 147
Heparin: Lipoprotein lipase liberation from adipose tissue, *Cherkes and Gordon,* 97
Oxidation, fat, effect, *Michajlik and Bragdon,* 164
Hydroperoxide: Methyl linoleate; interaction with serum lipoproteins, *Nishida and Kummerow,* 450
Hydroxy steroid(s): Determination as 3, 5-dinitrobenzoate (NM), *Colás and López,* 486
Hypercholesterolemia: Cholesterol-fed rabbits; NH_2-terminal amino acids of the serum lipoproteins, *Shore and Shore,* 321
Hyperlipidemia: Epinephrine-induced in dogs, modified by glucose, *Shafrir, Sussman, and Steinberg,* 109

I-K

Immunochemistry: Human tumor, ox spleen cytosides, *Rapport, Graf, and Alonzo,* 301
Inositol: Phospholipids (Rev), *Hawthorne,* 255
Isoleucine: Carbon; incorporation, lipids, adipose tissue, *Feller and Feist,* 90
Insulin: In diabetic rat; hepatic lipogenesis, cholesterogenesis, glycogenesis, effect, *Williams, Hill, and Chaikoff,* 236

L

Lecithin: Egg; fatty acids; saturated, unsaturated, positional distribution, *Tattrie,* 60
Lipase: Castor bean; action on endogenous substrate, *Ory, St. Angelo, and Altschul,* 208
Lipid(s): Aldehydogenic; nonphosphatide, milk fat, beef tallow, ox heart, *Schogt, Haverkamp Begemann, and Koster,* 446
Beef heart; myocardium, conducting bundle, *Kochen, Marinetti, and Stotz,* 147
Blood; arterial phospholipid synthesis, *Zilversmit and McCandless,* 118
Erythrocytes, human and bovine, chemical characteristics, *Hanahan, Watts, and Pappajohn,* 421
Ester groups, colorimetric determination (NM), *Antonis,* 485
Liver; response to rare earths in rats, *Snyder, Cress, and Kyker,* 125
Mass spectrometry (Rev), *Ryhage and Stenhagen,* 361
Plasma, human and bovine, chemical characteristics, *Hanahan, Watts, and Pappajohn,* 421
Serum; epinephrine, glucose, effect, *Shafrir, Sussman, and Steinberg,* 109
Lipolytic activity: Rat adipose tissue; changes in nutritional state, effect, *Robinson,* 332
Lipoprotein(s): Plasma; mobilization, role of pituitary and adrenal, free fatty acids, *Shafrir, Sussman, and Steinberg,* 459
Serum; distribution of tocopherol, *McCormick, Cornwell, and Brown,* 221
—; interaction with hydroperoxide of methyl linoleate, *Nishida and Kummerow,* 450
—; NH_2-terminal amino acids in normal and hypercholesterolemic rabbits, *Shore and Shore,* 321
Lipoprotein lipase: Liberation by heparin from adipose tissue, *Cherkes and Gordon,* 97
Liver: Lipid; response to rare earths in rats, *Snyder, Cress, and Kyker,* 125
Mitochondria; oxidation, cholesterol; dietary fat, effect, *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83
—; —, — —26-C^{14}; nicotinic acid, effect, *Kritchevsky, Whitehouse, and Staple,* 154
Phospholipids; analysis, hydrolysis procedure, *Hübscher, Hawthorne, and Kemp,* 433
Synthesis of fatty acid and cholesterol from acetate after fat feeding, *Hill, Webster, Linazasoro, and Chaikoff,* 150
Uptake and metabolism of triglycerides, *Stein and Shapiro,* 326
Lysolecithin: Serum; isolation and identification, *Gjone, Berry, and Turner,* 66

M

Mass spectrometry: Lipids (Rev), *Ryhage and Stenhagen,* 361
Menhaden: Body oil; unsaturated fatty acids; C_{18}, C_{20}, and C_{22} series, *Stoffel and Ahrens,* 139
Methyl esters: Preparation (NM), *Radin, Hajra, and Akahori,* 250
Methyl linoleate: Hydroperoxide, inter-

action serum lipoproteins, *Nishida and Kummerow,* 450

Mevalonic acid: Precursor of allyl pyrophosphates, squalene synthesis with liver enzymes, *Goodman and Popják,* 286

Mitochondria: Liver; oxidation, cholesterol−26C^{14}; nicotinic acid, effect, *Kritchevsky, Whitehouse, and Staple,* 154

—; —, —; dietary fat, effect, *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83

Peanut; phosphatidic acid synthesis, diglyceride phosphokinase activity, *Bradbeer and Stumpf,* 214

Molecular distillates: Corn oil; isolation and identification of sterol esters, *Kuksis and Beveridge,* 311

N

Nicotinic acid: Lack of effect on cholesterol metabolism in rat, *Duncan and Best,* 159

Oxidation, cholesterol−26-C^{14}, rat liver mitochondria, effect, *Kritchevsky, Whitehouse, and Staple,* 154

O

Ocular implant: Atherosclerotic aorta; infusions of phosphatides, effect, *Byers and Friedman,* 343

Oxidation: Cholesterol, rat liver mitochondria; dietary fat, effect, *Kritchevsky, Kolman, Whitehouse, Cottrell, and Staple,* 83

——26-C^{14}, rat liver mitochondria; nicotinic acid, effect, *Kritchevsky, Whitehouse, and Staple,* 154

Fat; heparin, effect, *Michajlik and Bragdon,* 164

Fatty acid by rat diaphragm, *Neptune, Sudduth, Foreman, and Fash,* 229

P-Q

Peanut: Mitochondria; phosphatidic acid synthesis, diglyceride phosphokinase activity, *Bradbeer and Stumpf,* 214

Phosphatide(s): Infusions; effect on atherosclerotic aorta, *Byers and Friedman,* 343

Phosphatidic acid: Synthesis; diglyceride phosphokinase activity in mitochondria from peanut cotyledons, *Bradbeer and Stumpf,* 214

Phosphatidylcholine: Chromatography, glass paper; *Muldrey, Miller, and Hamilton,* 48

Phosphokinase: Diglyceride; activity in mitochondria from peanut cotyledons, *Bradbeer and Stumpf,* 214

Phospholipid(s): Arterial; independence of synthesis from alterations in blood lipids, *Zilversmit and McCandless,* 118

Blood platelet, *Marcus, Ullman, and Wolfman,* 179

Cabbage leaf; composition, *Wheeldon,* 439

Inositol (Rev), *Hawthorne,* 255

Metabolism, rat diaphragm; fatty acid uptake, oxidation, *Neptune, Sudduth, Foreman, and Fash,* 229

Tissue; analysis, hydrolysis procedure, results with pig liver, *Hübscher, Hawthorne, and Kemp,* 433

Pituitary: Role in mobilization of free fatty acids and lipoproteins, *Shafrir, Sussman, and Steinberg,* 459

Plant(s): Fat metabolism; phosphatidic acid synthesis, diglyceride phosphokinase, *Bradbeer and Stumpf,* 214

Plasmalogens: Nonphosphatide aldehydogenic lipids, milk fat, beef tallow, ox heart, *Schogt, Haverkamp Begemann, and Koster,* 446

Platelet: Blood. *See Blood platelet*

Protein(s): Dietary; sulphur containing amino acids, serum cholesterol, effects, *Seidel, Nath, and Harper,* 474

R

Rare earths: Effect on liver lipids in rats, *Snyder, Cress, and Kyker,* 125

Rhodamine 6G: Lipid stain; preservation, photography (NM), *Grossman* and *MacEwan,* 488

S

Scintillation counter: Gas-liquid chromatography, measurement of radioactivity of vapors, *Popják, Lowe, Moore, Brown, and Smith,* 29

Spectrometry: Mass, lipids (Rev), *Ryhage and Stenhagen,* 361

Sphingolipid base(s): Microanalysis, *Sweeley and Moscatelli,* 40

Sphingomyelin: Chromatography, glass paper, *Muldrey, Miller, and Hamilton,* 48

Spleen: Ox, human tumor cytosides, *Rapport, Graf, and Alonzo,* 301

Squalene: Synthesis from allyl pyrophosphates by liver enzymes, *Goodman and Popják,* 286

Steroids: Hydroxy; determination as 3, 5-dinitrobenzoate (NM), *Colás and López,* 486

Sterol(s): Excretion in rats; cerebroside preparations, effect, *Carroll,* 171

Esters: Isolation and identification in molecular distillates of corn oil, *Kuksis and Beveridge,* 311

Sympathetic nervous system: Role in metabolism of free fatty acids, *Havel and Goldfien,* 102

T

Tocopherol: In human serum lipoproteins, *McCormick, Cornwell, and Brown,* 221

Triglyceride(s): Metabolism, rat diaphragm; fatty acid uptake, oxidation, role, *Neptune, Sudduth, Foreman, and Fash,* 229

Plasma, rat; determination (NM), *Cheng and Zilversmit,* 190

Serum; estimation, *Albrink,* 53

Tissue; separation by silicic acid chromatography (NM), *Horning, Williams, and Horning,* 482

Uptake and metabolism by rat liver, *Stein and Shapiro,* 326

Tripalmitin: Transport, dynamic state, *Reiser, Williams, and Sorrels,* 241

Tumor: Human, ox spleen, cytosides, *Rapport, Graf, and Alonzo,* 301

J. Lipid Research
October, 1960

New Methods Index

Vol. 1, Nos. 1-5

Compiled by John W. Farquhar and H. A. I. Newman

The numbers in this Index refer to entry numbers in the New Methods listings.
They are found on the following pages of Volume 1:
Nos. 1–67, pp. 135–138 Nos. 148–211, pp. 252–254
Nos. 68–147, pp. 193–196 Nos. 212–303, pp. 354–358
Nos. 304–426, pp. 490–495

BILE ACIDS: 26, 101, 102, 178, 179, 359
CHROMATOGRAPHY: 27, 63, 64, 65, 66, 146, 424, 425, 426
ENZYMES:
- **Esterases:** 422, 423
- **Lipases:** 61, 62, 421
- **Phospholipases:** 144, 145, 303

FAT SOLUBLE VITAMINS AND DERIVATIVES:
- **Tocopherols:** 56, 57, 58, 138, 207, 208, 414
- **Vitamin A and carotenoids:** 58, 140, 205, 206, 295, 296, 297, 298, 299, 412, 413, 415
- **Vitamin D:** 139, 141, 255

FATTY ACID: 36, 107, 108, 110, 115, 118, 123, 125, 185, 188, 190, 194, 267, 272, 273, 274, 277, 279, 280, 281, 370, 373, 378, 381, 382, 407, 426
- **Branched-chain:** 263, 276
- **Esters:** 34, 39, 112, 116, 119, 126, 128, 157, 193
- **Free:** 113, 191, 269, 372, 384
- **Hydroxy:** 40, 192, 383
- **Keto:** 262
- **Saturated:** 33, 109, 271, 383
- **Steam-volatile:** 120, 122, 379, 380
- **Unsaturated:** 35, 37, 38, 40, 111, 114, 121, 124, 127, 184, 187, 195, 196, 260, 261, 264, 266, 270, 275, 278, 371, 374, 383

FATTY ALCOHOLS: 108, 272, 280
- **Fatty aldehydes:** 185
- **Fatty amines:** 118

GAS-LIQUID CHROMATOGRAPHY:
- **Applications:**
  - **Physical chemistry:** 68, 71, 153, 224
  - **Preparative:** 4, 154, 228, 230
  - **Qualitative analysis or identification:** 1, 4, 10, 11, 16, 20, 75, 117, 137, 148, 155, 186, 189, 197, 221, 223, 226, 265, 286, 294, 307, 310, 325, 375, 376, 377, 408, 409, 410, 411
  - **Quantitative analysis:** 4, 16, 20, 74, 75, 150, 186, 189, 222, 226, 232, 286, 307, 313, 320, 376
  - **Radioassay:** 152, 314
- **Methods**
  - **Collection:** 3, 314
  - **Column:** 17, 70, 77, 154, 214, 216, 225, 230, 234, 308, 323, 360
  - **Detection:** 4, 9, 13, 14, 21, 74, 76, 151, 219, 223, 232, 305, 307, 310, 311, 312, 313, 320, 324
  - **Loading:** 19, 228
  - **Measurement:** 213, 215, 231, 305, 312, 325
  - **Moving phase:** 17, 78, 312
  - **Solid support:** 6, 7, 15, 149, 317, 323
  - **Solvent:** 11, 12, 15, 16, 20, 73, 78, 117, 189, 229, 234, 306
  - **Temperature:** 220, 318
- **Review:**
  - **Applications:** 5
  - **Methods:** 5, 76
  - **Solute class:** 5
  - **Theory:** 5, 76
- **Solute Class:**
  - **Alcohols:** 10, 75
  - **Aldehydes and close derivatives:** 226
  - **Amines:** 377
  - **Fatty acids and close derivatives:** 1, 4, 10, 18, 38, 75, 110, 117, 186, 265, 268, 305, 320, 322, 375, 376
  - **Glycerides and close derivatives:** 197, 286
  - **Other:** 72
  - **Sphingosine:** 203
  - **Steroids and sterols:** 360
  - **Terpenes:** 137, 148, 294, 408, 409, 410, 411
- **Theory:**
  - **Detection:** 76, 311, 312
  - **Measurement:** 2, 69, 312, 313
  - **Separation:** 8, 68, 117, 212, 217, 218, 220, 227, 233, 308, 309, 315, 316, 319, 321

GLYCERIDES: 41, 42, 43, 83, 129, 130, 131, 132, 133, 156, 282, 283, 284, 287, 362, 370, 385, 386, 387, 388, 389, 390
GLYCEROL ETHERS: 285
GLYCOLIPIDS: 53, 54, 200, 405, 406, 407
HISTOCHEMISTRY: 67, 85
LIPIDS: 22, 79, 80, 81, 82, 83, 84, 85, 86, 146, 156, 157, 158, 159, 160, 161, 162, 163, 164, 235, 236, 237, 238, 326, 327, 328, 329, 330, 331, 332
LIPOPROTEINS: 59, 60, 142, 143, 157, 209, 210, 211, 300, 301, 302, 416, 417, 418, 419, 420
PHOSPHOLIPIDS: 45, 46, 49, 52, 83, 136, 156, 157, 201, 288, 290, 292, 401, 403, 404
- **Hydrolysis products analysis:** 44, 50, 135, 202, 289, 392, 394, 399
- **Lecithin:** 400
- **Lysolecithin:** 393
- **Noncholine containing:** 46, 293, 397, 398
- **Phosphorus determination:** 48, 51, 199, 391, 395, 402
- **Plasmalogens:** 47, 134, 291, 396
- **Sphingomyelin:** 198, 400, 405

STEROIDS: 23, 24, 25, 95, 98, 100, 165, 169, 170, 173, 174, 176, 177, 240, 242, 245, 246, 247, 249, 251, 334, 345, 354, 355, 356, 358
- **Adrenal:** 87, 90, 91, 92, 93, 94, 239, 241, 243, 248, 252, 253, 341, 342, 346, 347, 348, 349, 353
- **Gonadal:** 89, 167, 171, 172, 244, 254, 335, 336, 337, 338, 340, 341, 344, 350, 351, 352, 357
- **Urinary:** 88, 96, 97, 99, 166, 168, 175, 248, 250, 333, 335, 337, 338, 339, 343, 351, 353

STEROL ESTERS: 27, 28, 29, 32, 83, 156, 256, 257, 366
STEROLS: 28, 29, 30, 31, 32, 83, 103, 104, 105, 106, 142, 158, 180, 181, 182, 183, 255, 257, 258, 259, 361, 362, 363, 364, 365, 367, 368, 369
TERPENES: 55, 137, 183, 204
WAXES: 147
